

WE will conduct business in a manner that conserves resources and minimizes our environmental footprint. We seek continual improvement in our environmental performance by setting, reviewing and updating environmental goals.

Our employees share in this responsibility and are accountable for the successful implementation of this policy. Local management is empowered to curtail operations, as necessary, to prevent serious environmental impacts.

We are committed to:

- Managing operations to comply with all applicable laws and regulations and other requirements to which we subscribe, with emphasis on pollution prevention, and minimizing adverse environmental impacts;
- Challenging our suppliers to work actively with environmental issues. Choose raw material suppliers with proven history and positive focus on their environmental work.
- When developing products and processes strive for solutions that minimize the environmental impact of our products.
- Minimize our energy use and constantly strive to find new solutions with lower environmental impact.
- Use water in an efficient and responsible manner. Protect water from contamination both during normal operation and in emergency situations.
- Minimize our emissions to air through the choice of materials, fuels and technology
- Minimize the amount of waste through materials selection, product design and process engineering. Reuse or recycle waste if it is technically and economically feasible.
- Challenge our freight forwarders to work actively with environmental issues. Constantly strive for logistics solutions that reduce the environmental impact of our transportation.
- Train and motivate our employees to minimize environmental impact in our daily work.
